9-10918

Discrete sampling point assembly - complete

Description

The 9-10918 is a discrete capillary sampling point. It is supplied complete with a 27mm diameter t-union, to which the flexible sample pipe connects. The flexible sampling pipe has a diameter of 10mm and is 1m long. At the end of the flexible sampling pipe, the discrete sampling point is connected. This sampling point assembly allow for almost invisible installation, when for example the capillary tube is intertwined with the chain of a chandelier resulting in sampling lower than the ceiling.
