ABT-LA-KIT

Kit for connecting the ABT-LA columns

Kit for connecting the ABT-LA columns

ABT-LA30 and ABT-LA60 units are linearray loudspeaker columns, which means they ensure considerably farther reach than conventional units at simultaneous maintenance of high uniformity of sound level in the area of broadcasting. Being line-array acoustic sources, ABT-LA columns feature a unique high directionality in vertical plane so that the sound they generate will rather go exactly towards the controlled audiospace instead of unwanted areas, such as e.g. ceiling or floor. ABT-LA columns are mostly designed for the rooms with high reverberation time as well as for other places where the quality of speech is reduced due to unfavourable conditions.

More information to read on the webpage of ABT-LA30 and ABT-LA60.
